The Proposal of Folk-Lifography on Urban Society

UCHIDA Tadayoshi

Many monographs on folk society in Japan had been dissected and researched. But, monographs on urban society weren't researched yet in folklore-studies. So, I'm now in inquiry about them, all over the urban areas in Japan. In its process, through many urban life records, I want to discuss on urban societies, urban areas and urbanity again. In this essay, I insist on some next strong points about "Folk-Lifography on urban society".

1) Discovery of urbanity.
2) Synthesis on urban life.
3) Movement of urban society.
4) Stranger in urban society.
5) Point of detailed view to urban life.
6) Various types of urbanity.
