Recently, publication of digital archives for historical materials has progressed. Accordingly, anyone can browse data about each historical material. The Kosode Byobu collection is one such historical materials, exhibiting clothing and fashion culture around the Edo period. Nevertheless, appropriate stories edited by experts are necessary for deep understanding of historical materials like the Kosode Byobu collection. Furthermore, various data sources by experts are also necessary to browse historical materials along appropriate stories. Therefore, we constructed a database system about the Kosode Byobu collection, using various data sources by experts. As a result, we were able to show information along appropriate stories edited by experts.

Key words: Digital Archives, Cultural Properties Database, Museum Exhibitions, High Definition Images, Arousing Interest
